

# Cover Letter

[Tarragona, Catalunya, 2023]

To Whom it May Concern,

I am a Senior Graphic Designer from Chile, with a solid background in graphic communication, illustration, and more recently, web development. Over the past years, my journey has taken me to Canada and New Zealand, where I not only perfected my English but also immersed myself in independent design projects, expanding my skills and international experience.

Key Highlights:

- > **Fluency in English:** My immersion in English-speaking environments equipped me with the language skills necessary to collaborate effectively with a diverse range of colleagues and clients.
- > **Web Development:** With my recent transition to web development, I gained experience in coding, UX design, and front-end development, adding an interactive dimension to my design capabilities.
- > **Illustration:** My proficiency as an illustrator enhances my ability to bring a unique artistic perspective to projects.

My proven track record includes leading design teams, mentoring new designers, and delivering a wide array of successful graphic materials. These experiences have cultivated my time management skills and honed my ability to excel under pressure.

Additionally, I'd like to mention that I arrived to Spain in order to attend a fullstack programming bootcamp, expanding my knowledge and skills in development.

I am excited to discuss how my diverse skill set can benefit your company. You can review my portfolio at <https://rodrigorosalesmoya.netlify.app/>. To schedule an interview, please contact me at: [rodrigo.rosalesmoya@gmail.com](mailto:rodrigo.rosalesmoya@gmail.com).

Sincerely,

**Rodrigo Rosales Moya**

## About me

I'm Rodrigo, an experienced art director with a background in graphic design, illustration, and web development. Living in Canada and New Zealand improved my English fluency. I recently completed a Fullstack web development bootcamp, merging design and development to create unique designs. I thrive on design and programming challenges, ready to apply my versatile skills to exciting projects, thanks to my diverse background.
